## OBJECTIVE

---

As a fresher, my aim is to secure jobs aligning with their career goals to gain valuable experience and contribute positively to organizations, fostering growth and networking opportunities.

## EDUCATION

---

**Diploma in computer science**, Sree dattha institute of engineering and science 2022-2025

**Secondary School Certificate**, Telangana State Model School , Kampasagar 2021-2022

## SKILLS

---

|                                         |                                                                    |
|-----------------------------------------|--------------------------------------------------------------------|
| <b>Languages &amp; Web Technologies</b> | Python, HTML5, CSS3, JavaScript.                                   |
| <b>Databases &amp; Backend</b>          | MySQL, MongoDB, Node.js, Express.js.                               |
| <b>Tools &amp; Frameworks</b>           | VS Code, GitHub, Postman, GitHub Copilot, Bootstrap.               |
| <b>Soft Skills</b>                      | Problem-solving, Communication, Critical Thinking, Time Management |
| <b>Interests</b>                        | Researching New Technologies, Video Editing, Chess.                |

## EXPERIENCE

---

### FRESHER

### PROJECTS

---

**Undobharat – Civic Issue Reporting Platform.** Developed a web platform to help citizens report local issues (e.g., damaged roads, water leaks) by uploading images, sharing live locations, and adding descriptions. Aimed at increasing public awareness and helping authorities take quicker action. **Tools Technologies:** : HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, GitHub, VS Code([Live Demo](#))

**F2C.** Developed a web-based platform that facilitates direct interaction between farmers and customers. The application enables customers to purchase groceries directly from farmers, promoting transparency, reducing middlemen, and supporting local agriculture.

**LEARNIFY.** Developed a responsive web-based platform using HTML, CSS, and JavaScript to provide students with easy access to academic resources. Learnify enables users to download textbooks and subject-related PDFs, view project documentation across various subjects, and access relevant YouTube videos during exam preparation. The platform features a simple login system where students enter their name and roll number to access content. This project was independently designed, developed, and debugged to solve the problem of centralized academic resource access. ([Live Demo](#))

**TIC-TAC-TOE** Developed an interactive Tic Tac Toe game using HTML, CSS, and JavaScript. Implemented game logic to handle player turns, check win conditions, and declare results dynamically. Utilized JavaScript to process game data, update the UI in real-time, and ensure a seamless user experience. Focused on efficient DOM manipulation and responsive design for cross-device compatibility. ([Play Now](#))

## ACHIVEMENTS

---

- Interested in make PPT's and presenting the ppt.Won 2nd prize in presentation in our college technical fest (PPT on Hammersecurity). ([check out here](#))
- i successfully completed five stars in hackkerank on python programming ([check out here](#)).
- Second prize in Hackathon (Learnify Project)
